PROJECTS

Designed a website for a bakery named cake frills:

Jan 2017 – Present

- Cake frills is a startup by an Indian woman who was residing at Virginia since 8 years. She was good at baking and designing cakes. To bring her talent out, I have designed an ecommerce website for her.
- The reference link : <http://www.cakefrills.cu.cc>

Tech Intern at ECIL, Secunderabad

May 2016 – June 2016

- The project entitled “Gas Agency” is done to make the manual process easier by making it a computerized system for billing and maintaining stock.
- Using Java web application and oracle database, I have developed a web app to make all the bookings easier for the customers, and managing the booking for employees were also made easy.

Software to Register Participants/Students Participating in College Fest*Dec 2015 – Jan2016*

Developed a software which can store and print details of participants/visitors with a unique fest ID using Django and Bootstrap frameworks

- Developed a software for issuing entry passes for people participating in an event/visiting college during college fests
- Student's entry for a pre-registered event is also monitored by the same software

Movie Ticket Booking system in visual basic*November 2015*

- Movie ticket Booking System in Visual Basic using Microsoft Visual Studio. All aspects including seat availability, booking a seat, automated bill calculation covered.

Interested in Blogging:

- Maintaining a blog with one of my childhood friends for 3 years with views of over 200+ in a day.
- <http://www.mrsidx.com>

AWARDS/ACHIEVEMENTS**Attended a two-day workshop on HTML in IIT Bhubaneswar**

- Bagged Merit in the workshop by creating a website within 10minutes.
